

WIMR SCIENTIFIC PLATFORMS USER FEES

This document is for researchers to use for grant applications in 2020. In December 2020 fees will be increased by the CPI rate (current rate on June 2019 is 1.6%). Prices listed below are for your 2020 budgets. Please include the CPI increase (recommended 2%) in your budget costs related to the 2021 and 2022 budget. Note from 2021 these will be rounded up to the nearest dollar after the increase has been applied.

Fees have been calculated using a cost recovery method and are intended to offset the cost of operating the facilities. This cost recovery model will ensure continued investment into these facilities, bringing researchers at WIMR world class technology to conduct their research.
